

In the Specification:

Please replace the following amended paragraphs:

The paragraph bridging pages 6 and 7, page 6 lines 21 to 25 to page 7 lines 1, insert the following paragraph.

The outer shell 40 is divided at a central longitudinally extending seam 50 which extends from an apex at the front wall 44 across the top 48 to the rear wall 46 centrally between the opposed side walls 42. The outer shell 40 is thus divided into to substantially equal sections 52 which are symmetrical about a vertical plane lying through the longitudinal seam between the two sections. [[.]] Each section includes one entire side wall 42 and an equal portion of each of the top 48, the front wall 44 and the rear wall 46.
